

NI WorldClass 2012

...drive your future

...employ your imagination

...have fun and be successful

What is NI WorldClass?

NI WorldClass is a technical project completed over a five-day period – from the first idea to the comprehensive, finished product. The project is ambitious – but possible!

Hardware and software from National Instruments and the robot system “Robotino” made by Festo will be combined and seamlessly integrated for the project mission. Student teams will tackle topics from measurement and control engineering to mechatronics, measurement and automation, robotics and embedded systems, and wireless communication.

Who should apply?

Science and technology students who want to intensively focus on the latest technologies while learning project management and presentation skills in an exciting and challenging environment.

When and **where** will it all happen?

NI WorldClass 2012 takes place from March 6-11, 2012 at National Instruments Germany in Munich.

How can students apply?

Detailed information and an online application form can be found at niworldclass.com.

Entry deadline: **December 5, 2011**

Participants will receive an "all-inclusive package" for the NI WorldClass program:
NI will welcome the selected candidates for five days as guests, including travel expenses, accommodation, meals, and a complimentary professional LabVIEW training course.
(We request proficiency in at least LabVIEW Core I prior to the program in order to participate.)
